

## FlexTime Manager for Unprecedented Variety and Flexibility

### Seamless activity period management without the hassle!

Teachers create and schedule their own activities for students to choose from  
Enjoy a dynamically updating, truly integrated attendance-taking experience

*"This product does exactly what it sets out to do: make the scheduling of flexible classes easier for administrators, teachers and students to accomplish."*

*"I would recommend this product as it is a great tool to easily schedule flexible enrichment periods or other types of classes. Teachers and students will find it easy to use, and it integrates with AERIES."*

— Teacher | Beverly Hills Unified School District | Beverly Hills, CA

### Effortlessly create and manage multiple activities

including:

- Regular activities (open to all)
- Closed activities (for special groups)
- Both academic and extracurricular activities
- Student remediation

*"An extraordinary program where students can select the activities in which they'll be involved. The advisor for each activity knows who is interested and attending. This allows for follow-up with reluctant students, getting them more engaged in the school community. Teachers can assign make-up activities for absent students that would override their extracurricular activities, helping students to remember that they need to complete academic work first. It will schedule tutoring sessions and has pullouts for remediation."*

— Department Chair | Coral Springs High School | Coral Springs, FL

### Optional peer tutoring interface\*

Increases students serving other students  
Simple, one-click peer-to-peer tutoring module matches qualified student tutors to those seeking help

*"This tool allows teachers to assign activities (like tutoring) to students. Prohibits students from signing up for other activities in the same time slot as a mandatory teacher-scheduled activity. Provides cut-off dates for activity sign-ups and allows students to see their entire week's schedule at a glance."*

— Teacher | Sheridan Technical High School | Fort Lauderdale, FL

\*optional features to be added in future release

### Lowers the stigma associated with remediation

Offering different academic activities during the same period boosts global participation so that individual students aren't singled out. Remediation needs are handled seamlessly

*"I could see this product being useful for a subset of students in a large population if the school desired to create a more flexible and differentiated program."*

— Science Teacher | Ocean Shores High School | Oceanside, CA

*"I like the idea of giving students the ability to customize their schedules themselves. The idea of empowering students with the ability to metacognitively think about their schedule is interesting to me."*

— Teacher | Mission View Public Charter School | Inglewood, CA

### Additional features and thoughtful programming make life easy!

- Optional notifications when activities are canceled or moved
- Seven different levels of priority management

*"I run both student government and leadership classes after school and this would allow me to better notify students and parents of meetings, as well as keep track of who shows up."*

— Teacher | Sheridan Technical High School | Fort Lauderdale, FL
