

EDUSPIRE SOLUTIONS

Eduspire Solutions supports schools as they leverage technology to personalize learning. See how our innovative software products transform education.

e-hallpass: a ground-breaking application designed to modernize today's antiquated methods of administering hall passes, e-hallpass digitally enhances accountability and security. Cloud-based hall passes are created and reviewed electronically while a central dashboard continuously logs and monitors student time in the halls, improving school security and emergency management.

FlexTime Manager: a software platform designed to eliminate administrative burdens associated with managing customized activity periods, FlexTime Manager allows schools to supercharge activity time and unleash its full potential by easily organizing schedules at-a-glance with increased communication and student choice.

VoiceChoicer: a uniquely student-centered application which facilitates student choice, participation, positive attitudes, and ease of scheduling for teachers. Through an easy-to-use interface and activity sorting system, students vote for their favorite options and are assigned to activities based on their preferences. Attendance is streamlined for teachers, making it easy to stay organized.

SCHedOOL: an innovative scheduling system which facilitates customization and flexibility for both students and teachers, this cloud-based application offers easy scheduling between a small team of teachers and their students. Teachers can offer a variety of sessions that are different from day to day, free of any bell schedule. Both students and teachers are sure to enjoy the enhanced communication and choice of activities tied to learning goals.
