

What is SHedOOL:

SHedOOL, by Eduspire Solutions, is a uniquely student-centric scheduling system which facilitates customization and flexibility for both students and teachers. This innovative, cloud-based application allows flexible scheduling between a small team of teachers and their students. Teachers can offer sessions that are different from day to day, free of any bell schedule, without constraints of start time, end time, or length of period. SHedOOL gives students choice in scheduling sessions, but also allows teachers to override as needed. Full transparency, overview, and accountability is provided so that teachers and admins have full visibility into student activities. Both students and teachers are sure to enjoy the enhanced communication, ease of scheduling, and choice of activities tied to learning goals.

Good For	Features	Benefits
Teachers	<ul style="list-style-type: none"> • Decide when to teach, what to teach, and how long to make each session without constraints of bell schedule 	<ul style="list-style-type: none"> • Teachers enjoy more options, flexibility, and convenience as they control their own schedule
Students	<ul style="list-style-type: none"> • Select teacher-offered activities or create student-driven activities tied to learning goals; selected activities are automatically placed onto schedules 	<ul style="list-style-type: none"> • SHedOOL easily manages student selections and changes, while teacher and student can keep a running record of progress towards goals within the system
Flexibility	<ul style="list-style-type: none"> • Ability to offer activities and classes that are not tied to the bell schedule; teachers can override a student's workshop choice if necessary 	<ul style="list-style-type: none"> • Both teachers and students benefit from more creativity, voice and choice while easily incorporating any necessary or mandatory sessions
Accountability	<ul style="list-style-type: none"> • The system requires students to check in for each activity while automatically creating attendance rosters that can be connected to the school's SIS 	<ul style="list-style-type: none"> • Teachers receive alerts when students check in and out; can provide feedback • Smarter attendance integration makes scheduling management truly seamless!
Customized Simple Scheduling	<ul style="list-style-type: none"> • Easy-to-use interface with drag-and-drop scheduling for teachers and students • Menu choices and activity types can be modified per school 	<ul style="list-style-type: none"> • Promotes organization and accountability to facilitate ease of identification and choice • Promotes simplicity and efficiency within a truly integrated framework

Cost and Implementation:

- Affordable per-user fees; varies by school size. Talk to your Solutions representative for details
- Typical implementation timeframe is 3-4 weeks
- Flexible implementation options including integration into SIS, Active Directory, or Google Apps for Education
- Runs on Apple, Android, and Windows operating systems for multiple device capability
